

Introducing Open Timetables

Open Timetables provides greater visibility of the timetable, allowing users to find and view the timetable of an element of the academic structure (for example, a programme of study) or a resource (for example, a particular location). Open Timetables shows the user all that item's activities on one timetable.

Swansea University Prifysgol Abertawe

- Lanes: Presents activities in a timeline format, in which each selected item gets its own row, with each item's activities appearing within its row. This view can help the user to compare resources.

The User Interface

Number	Element	Description
1	Search area	Use these tools to find items. Timetables can be viewed by POS (Programme of Study), Module or Location
2	Search results	To see an item's timetable, choose it here. To bring the timetable of multiple items together onto the same timetable view, the user can select multiple items here
3	Search results	The timetable of the selected items
4	View options	The user can choose which times, days, and weeks that they want to view timetable information for. If the user selects more than one week, the timetable combines all selected weeks' activities
5	Activity details area	If the user clicks an activity, its details appear
6	Language selector	Switch Open Timetables to a different language

Date range and time range

Users can choose which weeks, days, and times are included in the timetable. So, for example, you can choose to see only next week's timetable.
